**Subject:** PFAS - weekly recap for OPP IO

Hi Ed & Mike, so you don't have to sort through the now-4-pager, see below for a bulleted recap of yesterday afternoon's meeting, and other PFAS actions:

- Stakeholders – I spoke with Mark Hudson, Ag Container Recycling Council today. I scheduled time for next Wednesday to recap the issue and address technical questions for ACRC membership. I can lead, or you all if you'd prefer. I see this as similar to the HCPA meeting tomorrow. Some possible questions for the users at these meetings:
  - o How often are fluorinated containers used?
  - o When are they used? For what types of products?
  - o Have they seen this issue arise in the past? If no, because not tested or not seen?
  - o What do they know about fluorination facilities/service providers? Are there many facilities to choose from, or limited options?
- TSCA subpoena – We are still working to get information from OECA on status. Also, OPPT still working to get access to the CBI portion, considering their server move. Will report back next week.
- Scope & Process – OPPT is going to be discussing options for obtaining information to help figure out this question with their OGC; will report back next week. OPPT also exploring whether this is a TSCA new chem or old chem issue.
- ACB Lab testing
  - o Starting with the new containers today
  - o Any comments on Thuy's data report?
